Abstract: This article is concerned with the experiences of the Belarusian State University of Informatics and Radioelectronics (BSUIR) in the organization of incoming and outgoing academic mobility of students and staff within the period 2011-2016. In particular, the article describes BSUIR best practices in the organization of student exchange for semester studies and internships with Kazakhstan universities, as well as of practical training and internships within the framework of the International Association for Student Exchange IAESTE.
